

## Keywords index

Alumina/carbonitrides	653	Metallic glasses	645
Amorphous materials	657	Metallography	673
Amorphous metals	645	Methodology of research, analysis and modelling	661- 673
Arc melting	657	Microstructure	673
		Microstructures analyze	683
<b>Barnea-Mizrahi equation</b>	677	<b>Ni- based alloys</b>	645
Bearing rings	661	NiTi shape memory alloys	665
		Non-oxide preforms	653
<b>Computer aided teaching</b>	691, 695	<b>Optical microscopy</b>	673
CrSi compacts	673	Oxygen activity measurement	649
<b>Die geometry</b>	683	<b>Porous ceramics</b>	653
		Properties	657
<b>ECAP technology</b>	683	<b>Residual macroscopic stresses</b>	661
Education and research trends in materials science and engineering	691, 695	Retained austenite	661
E-learning	691, 695	<b>Sedimentation</b>	677
<b>Heat treatment</b>	665	SEM	673
High-speed centrifugal Compaction process	677	Severe plastic deformation	683
Hot pressing	673	Si <sub>3</sub> N <sub>4</sub>	653
HT-HP technique	687	Sintering	687
		Surface layers	661
<b>Immiscibility</b>	657	<b>TiB<sub>2</sub> ceramics</b>	687
Iron casting	649	Training simulations	695
<b>Materials</b>	645-653	<b>Virtual laboratory</b>	691, 695
Materials manufacturing and processing	677-687	<b>Wettability</b>	653
Mechanical alloying	645	<b>X-ray phase analysis</b>	665
Mechanical properties	657		
Melt spinning	657		
Metal reoxidation	649		
Metallic alloys	649, 665
