

Keywords index

Amorphous materials	73	Machining	105
Ball rolling mill	121	Magnesium alloy	97
Biomaterials	69	Materials	73-81
Casting	113	Materials manufacturing and processing	113-121
Coatings	105	Mechanical properties	73, 97
Composites	81	Metallic alloys	89, 93
Computational mechanics	109	Metallic material	69
Corrosion	69	Methodology of research, analysis and modelling	105,109
Elastic foundation	109	Microstructure	93, 117
Electron microscopy	93	Plastic forming	117, 121
Experimental planning	121	Potentiodynamic tests	69
Fatigue	89	Properties	89-97
FEM simulation	105	SEM	73
Finite Element Method	109	Sheet metal	113
Fracture mechanics	93	Stainless steel	121
Fracture morphology	73	Stress relaxation	97
Graphite	81	Strip casting	113
Hardening	97	Structure	89
Heat treatment	73, 89	Thermal activation	97
Hot rolling	117	Thermal behaviour	105
Intermetallic phases	93	Tool materials	105
Iron aluminides	117	Unequal diameter twin roll caster	113
		Unilateral contact	109
		Wear resistance	81
		XRD method	73
