

Keywords index

| | | | |
|-----------------------------|-----|---|------------|
| Abrasive wear | 83 | Levitation melting | 109 |
| Absorption | 109 | Lubricant | 117 |
| Acrylic denture resin | 79 | Machining | 117 |
| Aluminium alloy | 113 | Materials | 69-79 |
| Anodic dissolution | 95 | Materials manufacturing and processing | 109-121 |
| Arc melting | 109 | Mechanical properties | 91 |
| Austempered ductile iron | 101 | Metallic alloys | 69, 75, 95 |
| Austenite | 101 | Methodology of research, analysis and modelling | 101,105 |
| Biomaterials | 79 | Microalloyed constructional steels | 95 |
| Biting loads | 79 | Microstructure | 101 |
| Block sections | 83 | Model | 109 |
| Carbide tool | 117 | Mössbauer effect | 101 |
| Corrosion resistance | 95 | Nitrogen | 109 |
| Crystallinity | 121 | Pearlite morphology | 83 |
| Degradation | 105 | Plastic deformation | 69 |
| Diagnostics | 105 | Polymer composite | 105 |
| Dynamic recovery | 75 | Properties | 83-95 |
| Dynamic recrystallization | 75 | Retained austenite | 87 |
| Engineering polymers | 121 | Sliding composite | 91 |
| Ferrite | 101 | Stainless steel | 117 |
| Fracture toughness | 87 | Strain localisation and fracture | 69 |
| Glass carbon | 91 | Strength | 79 |
| Hot-compression test | 75 | Switch | 83 |
| Isothermal annealing | 83 | Thermovision | 105 |
| Kinetics | 109 | Tool materials | 87 |
| Lap welding | 113 | Tribological properties polymer composites | 91 |
| Laser welding | 113 | TRIP-steel | 75 |
| | | Wear | 117 |
| | | Welding | 109, 113 |
| | | Working properties of materials and products | 121 |
| | | X-ray phase analysis | 95 |
