

Keywords index

Al18B4O33	17	Mechanical and electrical properties	21
Austenitic stainless chromium-nickel steel	37	Melting	29
Best available techniques (BAT)	49	Metallic alloys	13, 29, 37
Bimetallic bars	53	Methodology of research, analysis and modelling	45
Biomaterials	33	Mg	17
Biting load	33	MMCs	17
Bone	33	Mössbauer spectroscopy CEMS	45
CCT-diagram	13	Numerical techniques	53
Composite materials	17, 25	Plastic deformation	37
Composites	21	Powder metallurgy	21
Deep drawing	37	Production and operations management	57
Denture attachment	33	Properties	37, 41
Electron microscopy	21	Residual stress	17
Environmental management	49	Rotary rolling	53
ERP/MRP computing systems	57	SaaS	57
FEM	53	Sintering	21, 25
Flank wear	41	Software as a Service	57
Gradient materials	25	Steel	45, 53
Heat treatment	29	Steel resistant to corrosion	53
Hypereutectoid cementite	45	Structure and mechanical properties	37
Integrated recycling technology	49	Structure modification	29
Laser Gas Nitriding LGN	5	Supercooled austenite	13
Laser Surface Alloying LSA	5	Technology devices and equipment	41
Machining	41	Temperature fix-points	29
Materials	13-33	Thermal cycling	17
Materials manufacturing and processing	49-57	Thermopower	29
		Titanium alloy	5
		Tool materials	25
		TRIP-steel	13
		Wear resistance	41
