

## Keywords index

Alumina carbonitride	97	Materials	69-79
Aluminium	117	Materials manufacturing and processing	111, 117
Aluminium alloy 2017A	93	Mechanical properties	83
Aluminium alloy 6013	93	Methodology of research, analysis and modelling	107
Cast iron	111	Microalloying elements	69
Casting	111	Motivation	121
Ceramics	79, 89	Optical absorption	101
Composites	83, 117	Oxygen	111
Dielectric properties	89	Phase transition	75, 79, 89
Dielectric relaxation spectroscopy	89	Photochromic effect	101
Dissimilar material welding	93	Polarization	75, 79
Education and research trends in materials science and engineering	121	Porous ceramics	97
Electrical properties	75, 79	Properties	83-101
Ferroelectric	75, 79, 89	Quenched and tempered steels	69
Friction Stir Welding	93	Si <sub>3</sub> N <sub>4</sub>	97
Graphite morphology	111	Sillenites	101
Hardenability of steel	69	Sine-Gordon model	107
High strength low alloy steels	69	Single crystals	101
HP-HT technique	117	Sintering	117
Kink solution	107	Strength properties	97
Long Josephson junction	107	Students	121
Manufacturing	69, 117	Teaching process	121
		TiB <sub>2</sub> ceramic	117
		Wear resistance	83
		Working properties of materials and products	83
