

Keywords index

| | | | |
|--|-----------|--|--------|
| A discrete superheater model | 43 | L iquid metallic alloys | 14 |
| Amorphous materials | 9, 35 | M agnetostriction coefficient | 9 |
| Arc melting | 35 | Materials | 5-19 |
| Attemperators | 43 | Mathematical simulation | 52 |
| B iopolymers | 19 | Mechanical properties | 35 |
| Blended learning | 57 | Melt spinning | 35 |
| C eramics | 5, 23 | Methodology of research, analysis and modelling | 39-52 |
| Channel geometry | 52 | Micro-granular matter | 19 |
| Cluster | 14, 27 | Microstructure | 52 |
| Computer supported education | 57 | Moodle | 57 |
| Crystallization | 9 | N al systems in unsteady operation conditions | 43 |
| Curvilinear coordinate system | 48 | Non-normal distribution | 39 |
| D esign of experiment | 48 | P air correlation function | 14 |
| Dielectric properties | 27 | Phase transformation | 27 |
| Dielectric relaxation spectroscopy | 23 | Process capability | 39 |
| Dielectric spectroscopy method | 5 | Properties | 23-35 |
| Dielectrometry | 31 | Q uality management | 39 |
| E CAP process | 52 | R elaxor | 23 |
| Education and research trends in materials science and engineering | 57 | S mart-design | 48 |
| Effective strain | 52 | Soft magnetic properties | 9 |
| Effective stress | 52 | Solid solution | 27 |
| Electrical properties | 5, 23, 31 | Statistic methods | 39, 48 |
| F erroelectric | 27 | Structure factor | 14 |
| I mpedance spectroscopy | 31 | T he outlet chamber of steam superheater | 43 |
| Interdigit comb capacitor | 31 | W ater uptake | 19 |
| Interdigit dielectrometry | 19 | | |
| Intermediate pipelines | 43 | | |
