

Keywords index

Adhesion	82	Metallic materials	103
AES	69	Methodology of research, analysis and modelling	96-110
Casting	118	Neural network	96
Cleaner production	118	Numerical techniques	103
Cold extrusion	110	Optimisation	96
Creep-resistance	89	Oxide ceramics	69
Dead metal zone	110	Pipe	89
Double electric layer	82	Powder injection	118
Durability of fatigue	82	Properties	82, 89
Electrical properties	82	PVD	69
Engineering polymers	89	RE zirconates	76
Finite Elements Methods	103	Shape complexity	110
Gradient coatings	69	Simulation (FEM)	110
HDPE High Density Polyethylene	89	Solid profiles	110
Industrial application of cleaner production methods	118	TBC	76
Injection lance	118	Technological efficiency	96
Materials	69, 76	Technological process	96
Materials manufacturing and processing	118	Thin&thick coatings	76
Mechanical properties	89, 103	Whiskers	69
Metal flow	110	XPS	69
Metallic alloys	76
