

Keywords index

Austenitic stainless steel	21	Materials manufacturing and processing	53
Cold rolling	21	Mechanical properties	21
Ductile fracture	21	Metallic alloys	21, 29
EBSD	13	Methodology of research, analysis and modelling	45
ECAE deformation	13	Nanomaterials	13
Electrical properties	37	Plastic deformation	21
Electron microscopy	45	Polymeric composite materials	37
Filler	37	Powder characterization	29
Graphite	37	Properties	37
High Power Diode Laser (HPDL)	53	PVD coatings	45
High-speed steel	5	Retained austenite	5
Induced martensite	21	Tantalum carbide	53
Laser remelting and alloying	53	TBC	29
Low-carbon steel	13	Tempering	5
Materials	5-29	Thin&thick coatings	29
		Tool materials	5
		Vanadium carbide	53
